DETAILED ACTION

Applicant's arguments, see Appeal Brief, filed 12/29/06, with respect to claims 17-32 have been fully considered and are persuasive. The Final Rejection of 6/1/06 has been withdrawn.

Allowable Subject Matter

Claims 17-32 are allowable. The following is an examiner's statement of reasons for allowance: With respect to claims 17 and 25, the Prior Art does not teach determining a quadrature-axis current component setpoint value; supplying the quadrature-axis current component setpoint value and rotational speed information to a decoupling network which contains a stationary machine model; determining a direct-axis voltage component and a quadrature-axis voltage component in the decoupling network as a function of only the quadrature-axis current component setpoint value, the rotational speed information and the stationary machine model; and converting the direct-axis voltage component and the quadrature-axis voltage component into triggering pulses for the synchronous machine.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Erick Glass whose telephone number is 571-272-8395. The examiner can normally be reached on 8-5 M-F.
